integrated blinds

www.intublinds.co.uk

No holes, no screws...
just style!

Integrate your blinds with your windows using our stylish INTU blinds. Suitable for tilt and turn windows as well as glazed doors, you can maintain the use of your windows and doors allowing you to open and close them with the blinds in place. Fitting the blinds into the window without the use of a frame gives a beautiful and elegant finish.

With no drilling or screwing required to fit them in your home, they are both quick to fit and easy to clean.

There are so many different options to choose from which complement your home. You'll be sure to find the perfect blind.

MICRO

Do you have bi-fold doors or compact spaces where you might struggle to find a blind to fit? Then our slimline INTU Micro system has been designed for you!

With a smaller fabric pleat size, you can choose from a range of Hive and Pleated fabrics which can be used in both bi-fold doors and windows, requiring a more compact blind option.

Complement your window or door frame with our choice of white, brown or anthracite rail colours and complementary endcaps.

To give you complete peace of mind, this system is also entirely child safe.

INTU Privacy

For those who would like some improved privacy or security from their Venetian blinds, why not consider INTU Privacy.

Venetian Blinds offer optimum light control, but our Privacy options takes this one step further. With no visible holes in the Venetian slat, Privacy gives a more complete closure in your window, minimising light gaps when the blind is in the closed position. This brings both a feeling of privacy, but also increased security when you are on holiday or away from home.

Choose to operate your blind with either a top or wand control to best suit your room. Our top tilt control allows you to operate your blind with no wands or cords for a beautiful, sleek finish. Complement your window with our choice of white, brown, silver or anthracite rail colours.

To give you complete peace of mind, this system is also entirely child safe.

Energy-saving elegance

If you're looking for your blind to bring you something extra, then our Hive Cellular Fabrics may be your ideal choice.

Hive offers an improved cellular pleated structure that provides increased **heat blocking** and **sound absorbent** capabilities as well as **anti-static** properties.

The unique cellular design will help trap air in an insulating layer, blocking heat from the sun and helping to keep your room at a lovely ambient temperature.

Hive fabrics are available in a wide range of Plain, Blackout, Fire Retardant and Luxury Designs. Also available in Micro, a neater cell size ideal for bi-fold doors or compact spaces.

STYLE STUDIO
Hive & Pleated Collection

Elegant style

INTU blinds have a stylish, curved fascia giving a sleek, modern appearance.

The streamlined bottomrail completes the blind with style and elegance.

STYLE STUDIO

Hive & Pleated Collection

Beautiful headrail

Perfect for bi-fold doors

Open doors or windows with blind in place

Quick to install, no drilling or screwing

Simple to operate

Child safe blinds
No loose cords or chains

Multi-zone option available

Larger side extrusions to reduce light gaps and improve privacy

**CHILD SAFE
PRODUCT**

For safety & style.

Designed to fully address concerns over safety, the INTU range is child safe by design.

The INTU system's neat and simple control options eliminate unnecessary free-hanging cord loops, creating one of the safest blinds you can buy.

Make sure you have peace of mind!
